Rohit Bhanose

Co-Founder at SwiftDineOS

8788457198 rohit.bhanose@gmail.com LinkedIn GitHub Start-up Pune, India

PROFESSIONAL SUMMARY

Second Year B.Tech student in Computer Science Engineering (Artificial Intelligence & Data Science) at MIT World Peace University, Pune, and Co-founder of SwiftDineOS, an **AI-powered restaurant technology platform**. Experienced in software development and AI-driven projects, with hands-on exposure to **Python, C++, and SQL**. Combines technical problem-solving and analytical thinking to develop technology-driven solutions for real-world challenges.

WORK EXPERIENCE

Co-Founder | Self-employed — Jun 2026 - Present
SwiftDineOS — *On-site · Pune*

- Co-founded SwiftDineOS, an AI-powered restaurant operating system, driving product strategy and business development.
- Coordinated product development for QR ordering, real-time table management, CRM, and analytics to streamline restaurant operations and improve customer experience.

Technologies / Skills Used : *React, Next.js, TypeScript, Tailwind CSS, Supabase, Prisma ORM*

Digital Marketing and Social Media Head | Part-time — Nov 2025 - Apr 2026
Aiera Mindlabs — *Hybrid · Pune*

- Managed social media strategy and executed reach-focused Meta Ads campaigns.
- Generated 100,000+ impressions, strengthening brand visibility and audience reach.

Technologies / Skills Used : *Meta Ads Manager, Canva, Buffer, Meta Business Suite*

PROJECTS

LevelUp | Website — Sep 2026
Lead Developer

- Developed a gamified event management platform featuring **Pokémon-inspired companion progression**, **QR-based attendance tracking**, XP rewards, leaderboards, and digital player passes.
- Built role-based portals for players, volunteers, and Superadmins, including session management, player onboarding, credential management, and attendance analytics. Implemented secure authentication, database-level access controls, and automated safeguards against duplicate attendance and XP awards.

Technologies / Tools Used : *React, TypeScript, TanStack Start, Vite, Tailwind CSS, Supabase, PostgreSQL, SQL*

ParkIT | Github
Lead Developer

Developed a camera-based parking management system that detects and reads vehicle number plates (YOLOv8 and EasyOCR) to automate entry, exit and slot allocation. Key features include:

- **Automated parking fee calculation** with peak-hour pricing, and entry/exit record management.
- User-friendly **Streamlit interface** with parking records stored in CSV or MySQL.

Technologies / Tools Used : *C, C++, Python, Streamlit, YOLO, OpenCV, EasyOCR, MySQL, CSV*

IndiaGuessr | Github Website — Jun 2026
Lead Developer

- Built IndiaGuessr, a GeoGuessr-inspired web application where players identify locations across India and around the world using Google Street View.
- Developed the project end-to-end during my semester break to explore **modern full-stack development**, gaining hands-on experience in **API development, database design, third-party integrations, and deployment workflows**.

Technologies / Tools Used : *FastAPI, React.js, TypeScript, SQLite, Google Maps Platform, REST APIs, Python, Vercel*

Leftovera | Github Website — Jan 2026
Lead Developer

- Developed Leftovera, a food-waste management platform connecting food establishments with NGOs and non-profits for food redistribution.
- Implemented city-based organization discovery and donation-category filters to help users find suitable donation partners.

Technologies / Tools Used : *React.js, JavaScript, Tailwind CSS, Vite, React Router*

SKILLS

Programming Languages :	C, C++, Python, SQL, HTML, CSS, JavaScript, TypeScript
Frameworks & Libraries :	React, Next.js, FastAPI, Flask, Tailwind CSS
Tools & Platforms :	Git, GitHub, Docker, Kaggle, Vercel, Render, Hugging Face, Linux, Promptfoo
Databases :	PostgreSQL, MySQL, Supabase, SQLite, MongoDB
Soft Skills :	Leadership, Communication, Problem Solving, Critical Thinking, Decision Making
Languages :	English, Hindi, Marathi, German

EDUCATION

MIT World Peace University | Pune — Jul 2025 - Apr 2029
B.Tech CSE — *CGPA : 8.4*

Second-year B.Tech CSE (AI & DS) student at MIT-WPU with experience in AI-driven projects, software development, and startup product development, skilled in Python, C++, databases, and modern web technologies.

IIT Madras | Online — Jul 2025 - May 2029
BS in Data Science and Applications

Pursuing a BS in Data Science and Applications at IIT Madras, currently at the Foundation level, building foundations in programming, mathematics, and statistics while developing analytical thinking, computational problem-solving, and data-driven reasoning through coursework and practical assignments.
